

Please leave the current law regarding our no call list as it stands. This law has been very effective in decreasing the amount of unwanted telemarketing calls coming into my home. I work nights, sleep during the day and I am opposed to telemarketers invading my privacy. Even with caller id, it is impossible to screen unwanted calls without laws such as the one already in effect here in Indiana. I would be opposed to any other legislation that may effect the law that we have now. It has been extremely effective, thanks to the diligence of our State Attorney's office.
